Mobile no: +91 9515965479

Tirupati, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Software Developer with experience in enterprise network troubleshooting and internship exposure to Python-based network automation. Strong foundation in Layer 2/Layer 3 networking and network protocol testing.

TECHNICAL SKILLS

Programming Languages: Python, Java, C.

Front-End: HTML5, CSS3, JavaScript

Back-End: Django, SQL

Networking: Routing & Switching, TCP/IP, Cisco Packet Tracer, GNS3, EVE-NG

Protocols & Services: DHCP, DNS, HTTP/HTTPS, VLAN, LACP, STP

Tools: - Git, Github, ServiceNow, Cisco vManage, Cisco Catalyst Centre

WORK EXPERIENCE

MS Network Engineer

NTT DATA – (Jan 2026 – Present)

Technologies: - Cisco Catalyst Center, ServiceNow, Cisco vManage, Routing, Switching, DNS, DHCP

- Managed day-to-day **network operations** across routing, switching, and connectivity environments, ensuring reliable service delivery.
- Performed **network troubleshooting and root cause analysis (RCA)** to identify issues and implement effective corrective actions with minimal disruption.
- Collaborated with **RMC, CSO, and cross-functional teams** to coordinate technical activities and ensure seamless service delivery.
- Prioritized and monitored network service requests based on **severity and business impact**, ensuring timely resolution within defined SLAs.
- Followed **ITIL-based service management practices** and maintained accurate documentation of troubleshooting activities, RCA findings, and resolutions.

INTERNSHIP EXPERIENCE

Software Engineer – I (Networking)

Tantude Technologies LLP – (Jun 2025 – Oct 2025)

- Developed and executed automated test cases for Layer 2 and Layer 3 networking protocols using **Python** and **PyATS**.
- Created reusable Python automation scripts to streamline network testing, reduce manual effort, and improve test efficiency.

- Performed network simulation, configuration, and troubleshooting using **Cisco Packet Tracer**, **EVE-NG**, and **GNS3**.

Full Stack Development (Professional Training – Full Stack Development)

Kodnest Technologies Pvt Ltd – Hybrid - (Mar 2025 – Oct 2025)

- Trained in Python, DSA, HTML, CSS, JS.
- Developed and deployed responsive web applications as part of full-stack training.
- Gained experience in data structures and database management.

PROJECTS

Enterprise Leaf-Spine Network Architecture for SBI Bank [Link](#)

Technologies used: - GNS 3, Cisco Packet Tracer, Wireshark, Putty.

Description: - Built a scalable Leaf-Spine architecture using **OSPF** for dynamic routing and **VRRP/HSRP** for high availability. Implemented **LACP** to increase bandwidth and provide link redundancy. Configured VPCs with default routes for seamless connectivity and deployed **DNS** and **DHCP** services for automated IP management and reliable name resolution.

Fake Indian Currency Detection using Deep Learning [Link](#)

Technologies used: - Python, Django, Html, CSS, JavaScript.

Description: - This project aims to develop a web-based application that can identify fake Indian currency notes using deep learning techniques. Leveraging a convolutional neural network (CNN)-Visual Geometry group (**VGG**), the system is trained on a dataset of real and counterfeit currency images to accurately classify notes based on visual features.

ACADEMIC PROFILE

Course	Institution	University/Board	Year	CGPA / %
B. Tech (CSE)	SV College of Engineering, Tirupati	JNTU-Anantapur	2025	8.70 CGPA
Diploma (CME)	Sree Vidyanikethan Engineering College	SBTET	2022	81.48%
SSC	Cambridge High School, Tirupati	BSEAP.	2019	9.70 CGPA

CERTIFICATES

- Programming in Java from NPTEL (Id no: - NPTEL24CS43S968800894)
- IT Essentials from CISCO NETWORKING ACADEMY
